n/a: unteathered—Type 2 cable required.

*Important product information

Terminology:

Tethered EV chargers are those with a nominated cable length attached to the EV charger, including a Type 2 connector (new electric vehicles).

Untethered electric vehicle chargers are those in which the EV charger cable (connecting the charger to the vehicle) is sold separately.

Prices include GST. Additional installation costs may apply (if required) learn more ›

Power Sensor

Add for solar optimised charging.
